

## Thomas Adams Scholarship

### Description

The Thomas Adams Scholarship is awarded for an outstanding research submission, as determined by the jury's score (the top score is awarded the CIP President's Scholarship).

### Amount

\$3,000.00

### Eligibility

To qualify for this scholarship, the applicant must be:

- A CIP student member in good standing for the current academic year. MCIP and provisional members who have returned to school are not eligible for the scholarship.
- A student enrolled full-time in an accredited Canadian planning program during the term of the award of the scholarship.
- Students in all levels of university study (Bachelor's, Master's, or PhD) have an opportunity to win, as the jurors consider the applicant's level in their adjudication.
- The project will either be proposed or in progress at the time of application with a target completion date within the current school year.
- The scholarship will not be awarded for any projects already completed.

### Criteria

The submission will be judged on the basis of its potential contribution to the planning profession (in theory or practice), or its potential service to a community or community group. In their deliberations, the jury will consider the following documents:

- A 500-word biography from the applicant outlining their studies, as well as their personal interests.
- A current resume demonstrating the applicant's past and present commitments to their community.
- A completed application form.
- A one-page description of the project submitted for consideration.

### Jury

The jury will consider the level of the applicant's program in their assessment of the submissions; therefore, both undergraduate and graduate student members are encouraged to apply. The jury will verify that the eligibility criteria have been met. Their decision is final.

### Deadline

The submission deadline date can be found on the CIP website.

### About Thomas Adams

Thomas Adams came to Canada in 1914 as a town planning advisor to the Commission of Conservation. He served as the first President of the Town Planning Institute of Canada and was largely responsible for establishing the profession in Canada.
